

Fact sheet LOGISTICS CONSULTANCY

Our service

Van den Anker is specialized as logistics service provider in the area of environmental critical products such as special chemical products, crop protection products, paints but also products in the cosmetic sector for instance aerosols with hairspray.

To offer these services we have the availability of over 78.000 pallets positions in specially equipped warehouse locations and a distribution system which involves 100 units guaranteeing an overnight service in the Benelux and parts of the other European countries. And naturally our employees – highly qualified people with day-to-day experience, constantly working to guarantee optimum safety and to deliver your goods at the right time, in the right quantities to your customers.

'The employees of Van den Anker take care of my goods properly and deliver them in the right quantities on the right time in the right place to my costumers'

It pleases us to advice you

We will be happy to assist you – for instance in taking the decision whether outsourcing is a right thing to do for your organization. With all the pro's en con's. We have developed the necessary tools to be able to guide you in the right direction – quickly and efficiently. Or, when you have taken the decision to choose for outsourcing, who will be the right logistics partner. Or, what will be the best location for your European logistics center.

For all these questions, we developed methods to give you the right answers in an efficient way.

Logistics projects

Besides this Van den Anker employs logistics engineers – highly educated employees with a good knowledge of the day-to-day operation, who are working on projects with existing customers and potential new customers. These are projects, where in close co-operation with our principals and with a maximum and open exchange of information, together logistics solutions are build. These can be in the area of for example EDI connections, in order to optimize communication, KPI's – Key Performance Indicators – or even totally new logistics concepts. With always in mind a 'higher customer service' and based on the day-to-day practice, without lengthy theoretical reports. After all, we are people who like to implement.

In a personal interview we are pleased to tell you more about our approach.

Call us.
